

PathNotes Project Team Bio

The founder of PathNotes Project is Peter Burrage. He is currently a teacher at Camosun College, in the Engineering Bridge Program. Peter hopes the prototype will attract investors, so he can start his own company.

PathNotes Project will create a new engaging learning atmosphere, replacing the presentation format currently in use. The product can be used in both small and large classroom settings, for all subject material.

Team Members are: Rossen Tzatchev, Taylor Jamieson and Jason McConnell.

Rossen Tzatchev is originally from Bulgaria, Europe. He moved to Victoria, Canada in 2002. Rossen holds a Master's Degree in Engineering. Currently he is completing his second year at Camosun College towards a diploma in Computer Systems Technology. Rossen is in charge of the Back End of the Project (PHP, Java Script etc.).

Taylor Jamieson is originally from North Vancouver, BC. He moved to Victoria three years ago. He has enjoyed using and taking apart computers/electronics from a young age. He is hoping to start his own app company but this is a long shot so he will settle for a good paying job somewhere until his first app makes it big.

Photo

Jason McConnell was born and raised on Vancouver Island. Currently living in Duncan, Jason has had a passion for all things technology his entire life. Once completing the Camosun College Computer Systems Technology diploma, Jason hopes to find work in Victoria as a software developer. Jason is handling all front-end design and code. (HTML5, CSS, Javascript, etc.)

We would like to say: Thank you, Peter. We hope to have the opportunity to work together again when the Project expands.
