

Dayle:

Dayle White has worked in Information Technology for over 13 years as an Assistant Manager, IT Coordinator, and Support Desk Administrator, before returning to Camosun full-time for the Computer Systems Technology program. After graduation, Dayle will be working as a site administrator for a local Victoria IT support company.

Roles: Project manager, secondary software developer, primary technical writer

Samantha:

Samantha MacDonald took Information Technology classes throughout high school before attending Camosun's Computer Systems Technology program. After graduation, she plans to find employment in the technology industry, with the long-term goal of a job in game development.

Roles: Primary software developer, secondary technical writer, researcher

Project description:

The North Park Neighbourhood Association (NPNA) is a non-profit, membership-driven society that is the voice of the North Park community at City Hall. The NPNA e-Newsletter and Website Refresh Project's primary goal was to create a new, modern website for the NPNA. This website includes an integrated e-Newsletter, an event calendar, an executives' forum, and a document archive, and the overall security of the website was considered paramount during its development.

The NPNA e-Newsletter and Website Refresh Project was developed by the 2 Legit 2 Quit project group, directed by the NPNA.

A thank-you to Camosun and the CST instructors:

2 Legit 2 Quit would like to thank the Camosun College Computer Systems Technology department for guiding us in the end-to-end skills required to plan, manage, develop, and execute our project at every step along the way.

The 2 Legit 2 Quit team can be contacted via email at npna.capstone@outlook.com.
