

The Educask project is an open-source project geared to create a better social network for education. Educask intends to bring the classroom to the internet to life by encouraging dialog between students. It will be a crossbreed of a social network and a Learning Management System (LMS).

With Educask, students will be able to communicate with teachers, administrators, and other students. Also, Students will also be able to view class materials and submit assignments. Teachers will be able to help their students, manage classes, and manage assignments. Administrators will be able to provide students and teachers with a safe and controlled online environment.

## the team

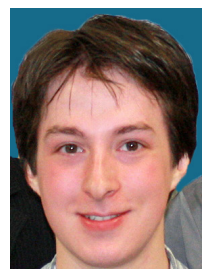

**Keegan Bailey** is a backend developer for the Educask project. He is working together with the team to make sure that all the solutions for Educask are completed on time. In his spare time, Keegan Bailey enjoys attempting to watch everything in the films and television universe. He also enjoys discovering and trying new independent video games, and is always curious to see what wonderful things a small team is able to create. After graduating from Computer System Technologies, Keegan would like to have a career in software development. Ideally, he would like to do something with Microsoft technologies however he is always open to any possibilities.

**Craig Isenor** has been with Educask for over a year. His primary focus is the display and design of the page, and works on the backend code. In his spare time, Craig likes to read about new technologies, watch documentaries, play music on whatever is available, and play video games. After graduation, he hopes to get a job in web development or game development, while still working on Educask.

**Keegan Laur** is the founder and project manager of Educask. He made sure that tasks were completed on time, and will oversee the future of Educask. Furthermore, Keegan designed and developed the backend to Educask. In his free time, Keegan enjoys watching movies, reading, writing, sailing, and further extending his studies. After Computer System Technologies, Keegan would like to have a career in software development. Ideally, he would like to do web development, design, and hosting. Keegan also hopes to work on Educask further and would love to see Educask in schools across British Columbia.

## thank you

The Educask team would like to thank the following people for their contributions to the Educask project:

- Graham Arts from the Sooke School District (SD62) for his support over the past year and for being our Capstone client.
- Camosun College faculty for letting us work on Educask as our Capstone project.
- Deid Reimer for his support over the past year and for being our Faculty Supervisor.
